Catia Designer & Expert

Course Overview

CATIA (an acronym of computer aided three- dimensional interactive application) is a multi-platform computer-aided design (CAD)/manufacturing (CAM)/computer-aided engineering (CAE) software suite developed by the French company Dassault Systèmes. It is written in the C++ programming language.

Commonly referred to as a 3D Product Lifecycle Management software suite, CATIA supports multiple stages of product development (CAx), including conceptualization, design (CAD), engineering (CAE) and manufacturing (CAM). CATIA facilitates collaborative engineering across disciplines around its 3DEXPERIENCE platform, including surfacing & shape design, electrical fluid & electronics systems design, mechanical engineering and systems engineering.

APSSDC primarily focuses on hands-on session for using CATIA which facilitates the design of electronic, electrical, and distributed systems such as fluid and HVAC systems, all the way to the production of documentation for manufacturing.
