

## Moodle Committee

### *Functions*

1. **Moodle LMS** enables us to build and upload e-learning content, administer that content, assess the users on it, measure their progress.
2. Easy-to-use, flexible and able to integrate with your existing systems, you can use a Moodle LMS to deliver compliance and competency training.
3. **Sharing learning materials-** With Moodle's *rich resource toolkit*, files and links to websites can be shared with learners easily.
4. **Managing access to learning materials-** *Group students into year or class groups* to automatically provide access to the appropriate learning materials. You can even control when specific course content becomes available to learners.
5. **Updating course content-** *Edit 24/7* via a browser to update and add to course content for learners to access immediately.
6. **Automated assessment-** Use a variety of engaging question types in a Quiz to assess the learning. Moodle can mark these and give immediate detailed feedback to the learners – ideal for *both formative and summative assessment*.
7. **Managing work submissions** – *Learners can submit work and receive feedback and grades* from the teacher.
8. **Monitoring progress / Reports-** Moodle's stores each learner's scores from any graded activities.
