INSOFE COURSE

Course Outcome

- Learning and understanding of the basic tools of data science
 - Interpret the Jupyter and numpy for data science.
 - Create and program a combination of working on large projects and introductions to advanced data analysis techniques.
- Day1 - Introduction: Welcome and overview of the course. Introduction to the data science process and the value of learning data science. , Background: In this optional week, we provide a brief background in python or unix to get you up and running. If you are already familiar with python and/or unix, feel free to skip this content.
- Day2 - Jupyter and Numpy: Jupyter notebooks are one of the most commonly used tools in data science as they allow you to combine your research notes with the code for the analysis. After getting started in Jupyter, we'll learn how to use numpy for data analysis. numpy offers many useful functions for processing data as well as data structures which are time and space efficient.
- Day 3 Pandas: Pandas, built on top of numpy, adds data frames which offer critical data analysis functionality and features.
- Day 4 - Visualization: When working with large datasets, you often need to visualize your data to gain a better understanding of it. Also, when you reach conclusions about the data, you'll often wish to use visualizations to present your results.
- Day 5 - Machine Learning: To take your data analysis skills one step further, we'll introduce you to the basics of machine learning and how to use sci-kit learn - a powerful library for machine learning.
- Day 6 Working with Text and Databases: You'll find yourself often working with text data or data from databases. This week will give you the skills to access that data. For text data, we'll also give you a preview of how to analyze text data using ideas from the field of Natural Language Processing and how to apply those ideas using the Natural Language Processing Toolkit (NLTK) library.
- Final Project: These weeks let you showcase all your new skills in an end-to-end data analysis project. You'll pick the dataset, do the data munging, ask the research questions, visualize the data, draw conclusions, and present your results.

ABOUT THE COLLEGE

Anil Neerukonda Institute of Technology and Sciences (ANITS), Visakhapatnam was established in 2001 by Anil Neerukonda Educational Society (ANES). ANES works to promote technical and human values through various educational institutions, without any motive for profit. ANITS is located in Sangivalasa village of Bheemuni patnam mandal, about 30 km from the beautiful city of Visakhapatnam. The college has been accredited by NAAC, NBA, UGC and attained autonomous status in the academic year 2015-16. The college has been awarded "Centre of Excellence" by Infosys Technologies in the year 2011 and "National Employability" in 2014 by Aspiring Minds, New Delhi. Undergraduate and postgraduate programs in CSE, IT, EEE, ECE, Mechanical, Civil and Chemical Engineering are being offered at ANITS. With a unique team of governing body, inspiring management, and proficient educators, *ANITS envisions to emerge as a world-class technical institution whose products represent a good blend of technological excellence and the best of human values.*

ABOUT THE DEPARTMENT

The Department of Chemical Engineering was started in the year 2012 and has an efficient group of faculty from IISc, IITs, BITS and other reputed state universities. The department is well equipped with chemical and interdisciplinary laboratories.

The faculty participate actively in the state-of-the-art research and continuously thrive to update knowledge and skills. The same is imparted to the students in classrooms by conducting workshops, seminars and conferences to craft the next generation of engineers. Modern teaching methodologies are implemented to foster an improved classroom environment. *The department envisions to emerge as centre of excellence in Chemical Engineering and attain global recognition in fulfilling the needs of industry and society.*

ABOUT THE WORKSHOP

Indian Chemical Industries contribute to 6% of our GDP (\$ 135 billion). For efficient technological production of chemicals, a chemical engineer requires thorough understanding of the process that comprises of various equipment like reactors, heat exchangers, distillation columns, etc. and numerous instruments like pressure gauges, flow meters etc. **Process Flow and Instrumentation Diagrams** help Chemical Engineers not only to understand the underlying process, but also in evaluating various process controls to optimize the production and to safeguard against possible workplace accidents. This workshop aims at bridging the gap between the academic and industrial approach of studying and understanding the **Process Flow and Instrumentation Diagrams** by providing **hands-on experience** to the fresh chemical engineers to face the challenges when they start working in the industry.

ABOUT THE COLLEGE

Anil Neerukonda Institute of Technology and Sciences (ANITS), Visakhapatnam was established in 2001 by Anil Neerukonda Educational Society (ANES). ANES works to promote technical, and human values through various educational institutions, without any motive for profit. ANITS is located in Sangivalasa village of Bheemunipatnam mandal, about 30 km from the beautiful city of Visakhapatnam. The college is accredited by NAAC, NBA, UGC and attained autonomous status in the academic year 2015-16. The college was awarded "Center of Excellence" by Infosys Technologies in the year 2011 and "National Employability" in 2014 by Aspiring Minds, New Delhi. The college offers undergraduate and post graduate programs in various disciplines of engineering such as CSE, IT, EEE, ECE, Mechanical, Civil and Chemical Engineering. ANITS has strived to train young men and women into confident and competent engineers. With a unique team of governing body, inspiring management, and proficient educators, ANITS continues to march forward with greater zeal and dedication to become a world class educational institute.

ABOUT THE DEPARTMENT

The Department of Chemical Engineering was started in the year 2012 and has very efficient team of faculty. The faculty participate actively in state of the art research and continuously thrive to update knowledge and skills. The same is imparted to the students in class rooms by conducting workshops, seminars and conferences to craft the next generation of engineers.

The department is well equipped with chemical and interdisciplinary laboratories. Modern teaching methodologies are constantly implemented to foster an improved class room environment. Team work among students is encouraged to inculcate positive work habits and passion to work wisely, creatively and effectively.

ABOUT THE WORKSHOP

Indian chemical industries emerge as one of the focus destinations for chemical companies worldwide, which accounts to \$ 36 billion (3% of the global economy). In addition to producing bulk and fine chemicals through traditional routes, the industries are now focussing on novel technologies such as nano-technology, fermentation and biofuels. The technology of production of chemicals requires intense understanding of process flow sheets which comprise of various types of reactors, pumps, heat exchangers, condensers, distillation and absorption columns etc. The detailed study of process flow sheets coupled with process control helps the chemical engineer to produce the products at maximum productivity. It also allows varying the process conditions in case of any fire and explosion in the industry. This workshop helps in bridging the gap between academic and industrial approach to study the flow sheets. The workshop covers topics like overview of process engineering in industrial perspective, various pumps, process flow diagrams, piping and instrumentation diagrams, trouble shooting etc. The workshop also aids in facing the challenges arised when the fresh engineers start working in the industry
