Date: 29-02-2016.

To
The Principal,
ANITS.

Sir,

Sub: Request for organizing 5- Day workshop on Automobile and vehicle Dynamics - Reg.

We are planning to organize a 5- Day workshop on **Automobile and vehicle Dynamics** to enhance the theory and practical skills in the area of Automobile field, as the subject belongs to core Mechanical Engineering. The workshop is organized in collaboration with ELITE TECHNO GROUPS from 2nd to 6th March, 2016. The total number of students who are willing to attend the workshop is around 100.

Hence we request your kind permission for organising the workshop.

To
HOD (Mech)

Appd.

Pl. Compensate
the class work.

**5 DAY TRAINING PROGRAM ON
AUTOMOBILE AND
VEHICLE DYNAMICS**

Who we are

The founder of *Elite Techno Groups*, Himanshu Arora found it in themselves to respond to the need of industry ready engineers in the mechanical/automobile segment. *Elite Techno Groups* work towards helping students embrace the industry requirements by exposing them to real world scenarios and providing them with the impetus to apply their skills and knowledge to tackle the issues presented.

How we do

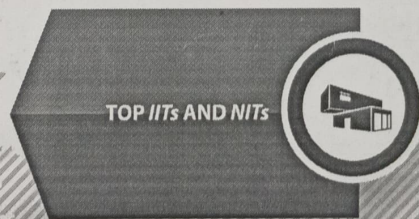

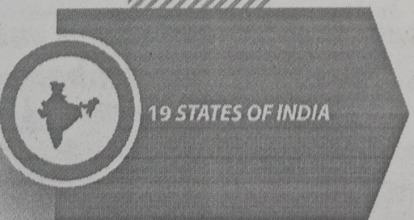

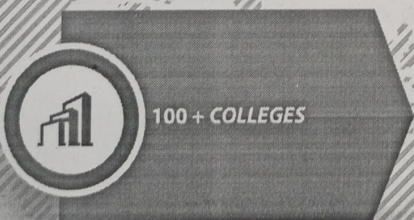

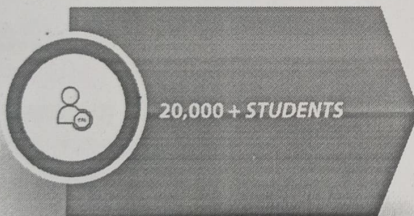

Elite Techno Group organizes training programs where our expert faculties conduct the workshop in an interactive manner with the participants working on the application of what they are taught during the course of the workshop. Various individual and team based exercises are conducted so that our future engineers are comfortable working with others as they are with themselves.

Also, in light of the recently developing racing event in India which has captured the interest of all the major colleges and students, we offer specially designed courses to give students a head start as they begin to design & fabricate their cars for BAJA-SAE, SUPRA-SAE/F-SAE, Go-kart events.

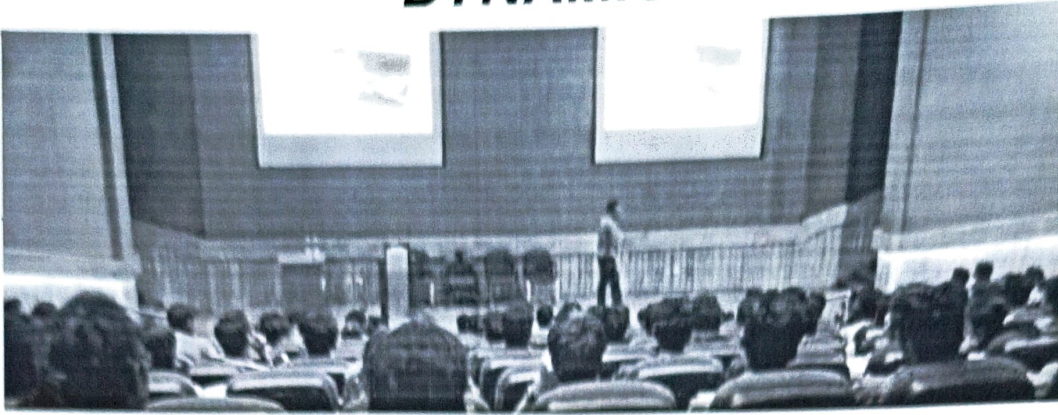

What makes us different

Elite Techno Groups has a dedicated team of faculties that leaves no stones unturned in educating and motivating their students to dream big. Our logistics team ensures that our students have the necessary equipment to engage in various pre-determined exercises during the workshop. These equipment's are in compliance to industry standards so that they have a simulated experience of the industry.

But above all, the reason why we are good in what we do is that we maintain a personal bond with our students. Our staff ensures that the students feel at ease with the faculties during any conversation within or outside the classrooms. Be it a random doubt or some obstacle during the preparation for a competitive event, our faculties will get the students out of bind.

India's biggest "AUTOMOBILE & VEHICLE DYNAMICS" Training Program

Main Highlights of the 5 day,

- Automobile engineering - 2 day (16 hours)
- Dynamic balancing - 2 day (16 hours)
- Practical session for hand on experience - 1 day (8 hours)

1) Static: In this part we will be discussing static parts of automobile that how each and every component works,

- Fundamentals of chassis design
- Suspension system
- Braking system
- Steering system
- Engine working and fundamentals
- Types of chassis, braking, steering, suspension and their disadvantages and advantages

2) Dynamics: In this part we will be discussing dynamics of automobile in deep and discuss how to balance all the components of a car,

- Steering dynamics for designing & balancing of an ATV vehicle.
- Braking performance triangles – balancing of brakes for an ATV vehicle
- Calculation of steering, suspension & braking system
- Derivation of drifting equation and turning equation – balancing of steering system for commercial cars and racing cars (case study on balancing of ATV steering system)
- Rendering tools, chassis designing parameters – designing & balancing of space frame chassis for ATV designs
- F.E.A – stress analysis on chassis design (space frame of an ATV), front impact, side impact and roll over testing of frame

Designing of suspensions – first in grid sheets and then complete analysis of designing parameters – case study on designing of double wishbone suspension for ATV

3) Practical Session:

Practical working of engine will be experienced by the participants while disassembling and assembling a multi cylinder car engine.

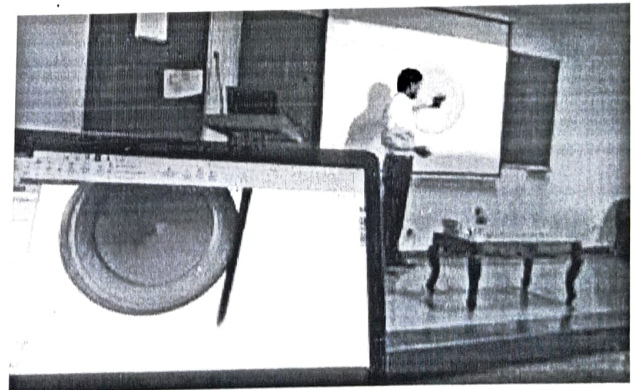

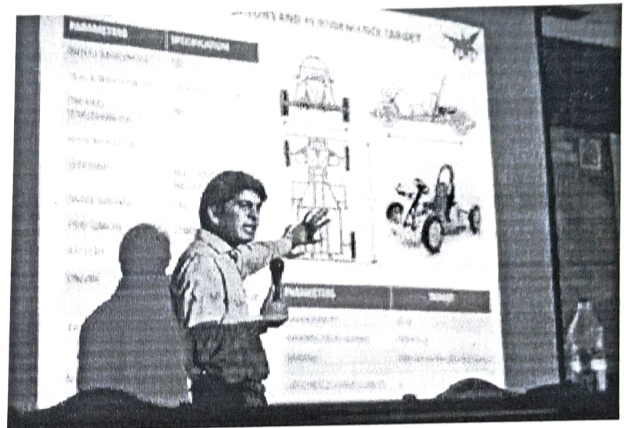

Day wise description

Day 1 Topics,

- Introduction to "Automobile Engineering"
- Difference b/w super, ATV, sports, formula car
- Chassis
- Goals of chassis
- Types of chassis: a) Monocoque b) Ladder-frame c) Space-frame d) Back-bone chassis
- Types of cars based on that
- Rigidity and uses of different types of chassis
- Suspension system design parameters
- Types of suspension springs
- Uses and applications of each
- Concept of all terms related to suspension designing (camber / caster / king pin inclination / toe angle / bump & rebound / spring rate / camber thrust / jacking forces)
- Types of dampers and application
- Suspension mechanisms

Day 2 Topics,

- Steering mechanism
- Types of steering mechanism
- Co-ordinate system for mechanism
- Euler angles
- Turning radius
- Cornering stiffness
- Slip angle
- Jacobian matrix application in automotive dynamics
- Steering ratio
- Derivation of turning equation
- Concept of understeer and oversteer
- Concept of drifting
- Suspension designing and balancing parameters
- F.E.A
- Anti-dive and anti-squat geometry
- Balancing of double wishbone suspension for offroad and on road application
- Spring rate and dynamic camber calculation
- Camber change rate
- Front view swing arm & side view swing arm length calculation
- Braking mechanism
- Braking dynamics
- Braking performance triangles
- Braking dynamics
- Braking performance triangles

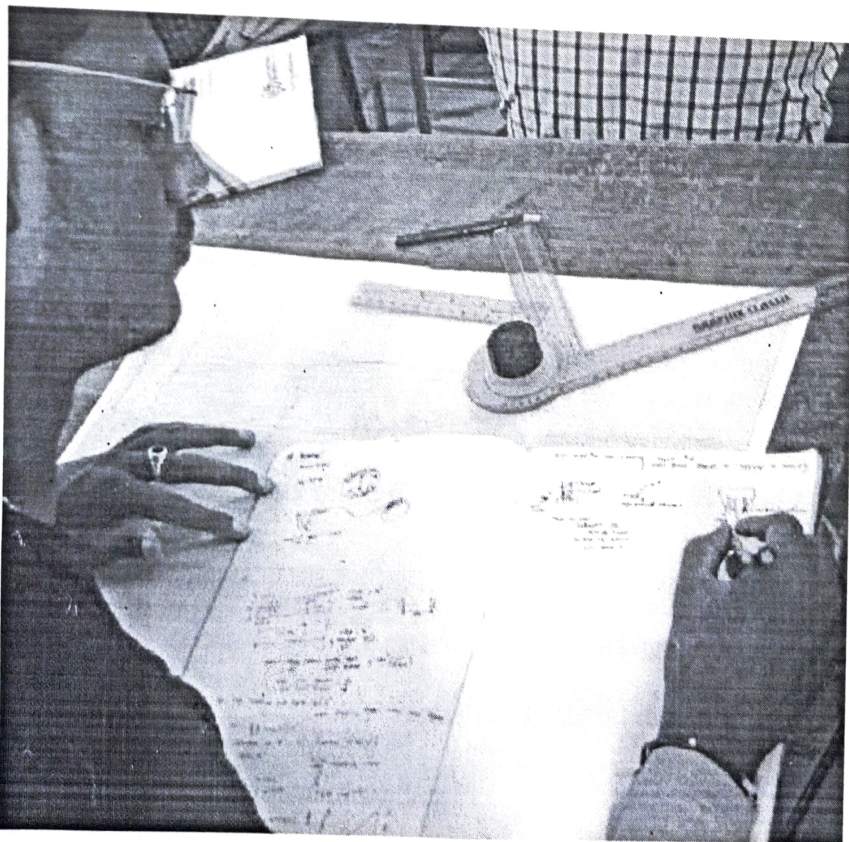

Day 3 Topics,

- Basic working of I.C. engine, types and categorization
- Components of an I.C. engine
- Valve timing diagram and its optimization for performance as well as economy
- Dynamics of I.C. engine
- Tuning parameters of a spark ignition-four stroke fuel injector single cylinder engine
- Intake manifold roughness calculation and advantages
- Optimization of volumetric, combustion and thermal efficiency for a commercial vehicle engine

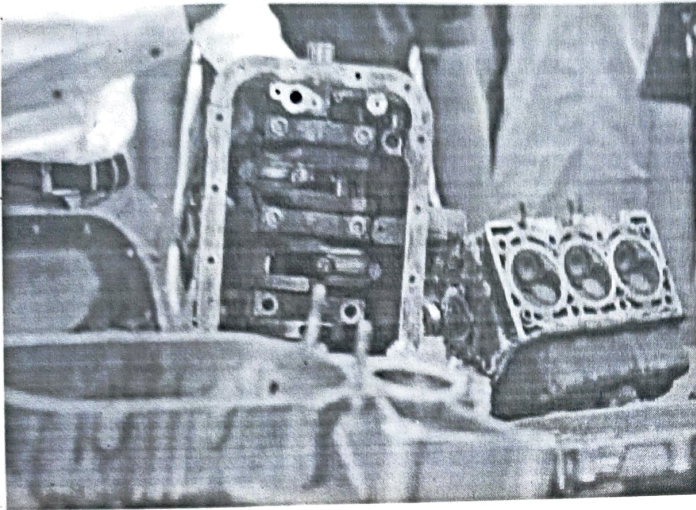

Day 4 Topics,

- Fundamentals of aerodynamics
- Physical & mathematical explanation of flight
- Application of aerodynamics in automobile industry

Day 5 Topics,

- Practical session on IC engine assembly and disassembly

Certification

All the participants will be given "Certificate of Participation" and 5 students will get "Certificate of Appreciation" (on basis of a test taken at the end of training program) issued by "ELITE TECHNO GROUPS".

Requirements from college

- Seminar hall with a capacity of 200 students
- Projector system and mike system facility
- Accommodation facility for the faculty

Course Kit

- Every participant will get a course book on "Automobile & Vehicle Dynamics".
- A DVD containing 32 e-books, videos on subsystem of automobile and videos tutorials for further references.

Course fee

Fee for per participant including the kit & 14% service tax will be Rs. 2850/- only.

AUTOMOBILE AND VEHICLE DYNAMICS

Contents of workshop:

- Introduction to Automobile Engineering, chassis, suspension mechanism.
- Steering mechanism, FEA, breaking mechanism.
- basic concepts of IC Engines.
- Aerodynamics.

Course outcomes: The student will be able to

- Distinguish the different systems in an automobile and describe their functioning.
- Identify the components of an IC Engine and further understand the significance of the working parameters on the efficacy of engine.
- Analyze the basics of dynamics involved in automobile design.
- Identify the forces exerted on the suspensions of an automobile and further use them in its design.
- Apply the fundamental design concepts for chassis design and its stress analysis.
- Execute the disassembling and assembling of a multi cylinder car engine.
